STAGE 2 CONT'D

(Biological)

human  
sitting  
near manmade

At squint  
look up  
learning  
hard to see it all

outdoors  
grassy  
warm  
light  
red

(motion)

stiff wave  
attributed to manmade  
moves then stops  
up high  
presence apparant  
sort of back and forth  
fold and unfold  
rounded metallic end

Red Flag

### STAGE 3 Summary

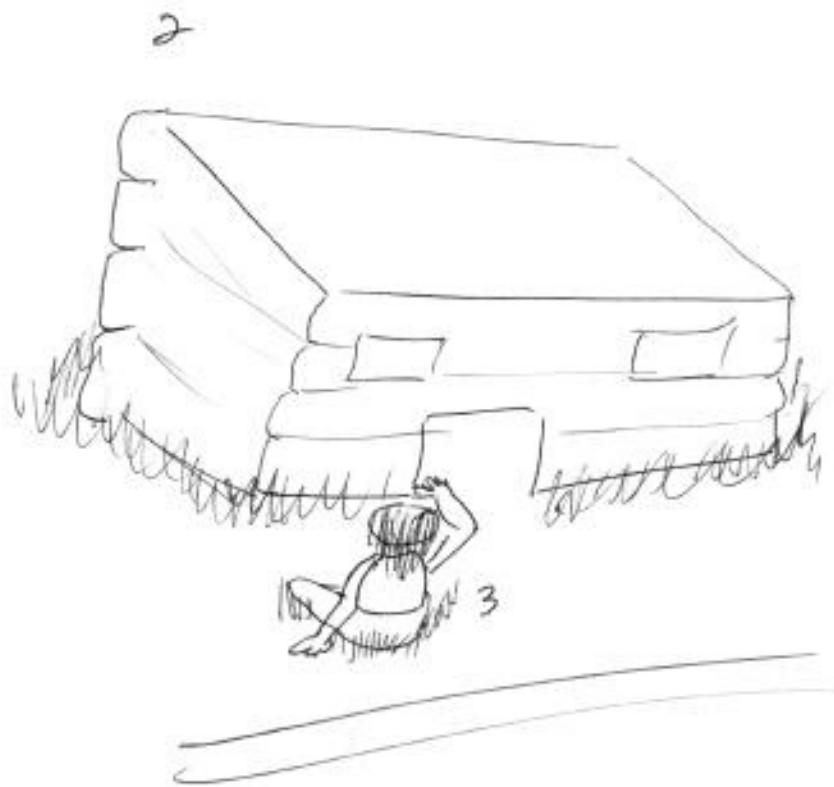

I sense the target has gestalts of <sup>man-</sup>made, biological and some motion. There are two primary manmade, one is a structure. The structure is masonry but also glassy. Rectangular. The design of the structure makes it feel heavy and solid perhaps it is formed from blocks, but tan color. It has a feeling of sitting firmly, solidly into the land. Like a giant pushed it into the ground. But it also has green around it like vegetation.

a second manmade is apart but attached somehow. It can move back and forth in the air. It may be a mechanical operation?

I sense biological interested in it. Looking up, shading eyes. Biological is comfortable. Sitting on ground. Young adult. May be more than one since I feel comments being made, talking.

Path nearby.

The smaller manmade could have some symbolic meaning. Or educational.

1 (Manmade)

straight metallic  
bellows-like top  
woven texture  
curved metallic nose  
vertical

2 (Manmade)

structure  
not housing  
official  
cement-like  
glassy parts  
green surrounds

3 (biological)

female  
young adult  
looks up  
watching movement  
understanding movement

4 (motion)

back and forth

STAGE 4
